trehullsrister og stammevern

Moderne trehullsrister og stammevern fra serien Arbottura inneholder sirkulære og kvadratiske løsninger. Ristene leveres kjørestærke opp til 3,5 tonn (noen modeller 2 tonn). For å tilføre spennende detaljer for området kan noen av stålspilene lakeres i friske farger. Serien inneholder hullrister med eller uten stammevern. Varmgalvanisert stål.

For rister som tåler bare gangtrafikk ta kontakt med oss.

Forankringsramme er inkludert i risten.
